FAN-TASTIC Vent Produces 2,000,000th Fan

Imlay City, MI – August of 2006 saw Fan-Tastic Vent Corporation produce their 2,000,000th fan. Fan-Tastic Vent Corporation started producing fans in Burton Michigan in 1985 with the goal of building a high performance product that operated quietly and economically.

Since the inception of the original Fan-Tastic Vent, various add-ons like in and out switches, thermostats, rain sensors and the newest radio frequency remote fan 6600 introduced earlier this year have kept Fan-Tastic Vent as the leading air exchange system lead. Each fan had different features but the capability of the fan to move up to almost 1000 cubic feet of air every minute gives the user a comfortable environment day and night.

“We are very proud to be the Fan company OEM’s and Customers ask for by name,” states Fan-Tastic Vent’s CEO Penny Milks. She adds, “We provide a great product and stand behind it 100% and the customers know that they are getting quality with each fan we produce.”

Leading the Recreational Vehicle market for all 12-volt air moving systems, All models of Fan-Tastic Vent are available through Distributors or any RV Dealer worldwide.
