## New "Endless Breeze" From Fan-Tastic Vent

Imlay City, Michigan -- Fan-Tastic Vent Corporation, manufacturer of 12 volt air exchange systems for the past fifteen years, announces "Endless Breeze" a powerful portable 12 volt fan.

Endless Breeze is a high volume 12 volt fan with a twelve inch blade and operates at three speeds. Air movement of over 900 CMF (cubic feet per minute) is a major breakthrough in 12 volt portable fans. Portable it is! Standing only fourteen inches high on retractable legs and less than three inches thick it travels and stores easily. It weights under five pounds. Endless Breeze can be powered by any 12 volt power source such as automobile lighter outlets or connecting jumpers to any 12 volt battery. Maximum amp draw is less than three amps per hour. Equipped with a six foot cord and initially including an eight foot extension as an introductory bonus. The fan operates efficiently up to fourteen feet from its power source.

The uses for Endless Breeze are literally endless! Boats, tents, campers, sleeper cabs, horse trailers, power failures and the family car, van or SUV are a few of many applications. "We've had customers tell us they have used them to blow the bugs away on hot muggy nights or even help thaw out the RV refrigerators," said Dave Struck, Fan-Tastic's Vice President of Sales and Marketing.

Endless Breeze 12 volt fans will be available through mass marketers, specialty stores and specialty catalogs.
